

Addendum No. 1 to
RFP 2122-04 Technology Equipment (E-Rate)
Addendum Dated: November 12, 2021
Original RFP Issued Date: November 4, 2021

All questions received are posted below with corresponding answers.
The RFP timeline remains unchanged.

Q: Clarification of licensing requirements listed on Page 7 of RFP.

A: REVISED TO Any contractor participating in this opportunity must have a valid ~~California Class A-General Engineering Contractor's license and/or a California Class C-4~~ **California Class C-7 Low Voltage Systems** Contractor's License.

Q: Are proposers required to be present at opening?

A: No, this is a non-public opening.

Q: Is cabling required for this installation, or are the cables already run to the access point positions (similar to an AP replacement project)? If the cables are not run, are you expecting CAT6 or CAT6A to the AP positions? Similarly, are you expecting new cables to be run between switches and to the listed telephone handsets?

A: There will be no new cabling required. However, we did include patch cables to connect the switches to the patch panels in the IDFs and MDF.

Q: For Basic Maintenance, are you looking for Service Provider quotes for BMIC or are you looking (for cisco) Cisco Base (erate eligible) or Smartnet (cost allocated maintenance)?

A: We are requesting the normal Cisco SmartNet agreement on the networking equipment. Usually, all new equipment arrives with one year of standard Cisco SmartNet.

Q: Are you looking for the same (question above) for the telephone handsets?

A: Telephone handsets are not E-rate eligible. We are not requesting any basic maintenance on the handset besides the standard Cisco warranty on the handset for the first year.

Q: Do you want the ineligible equipment broken out of the single pricing grid?

A: Proposed prices should align with the format presented on page 10 of the RFP.

If the equipment is E-Rate Eligible, then pricing should be filled into the provided E-Rate Eligible columns.

If the equipment is E-Rate Ineligible, then pricing should be filled into the provided E-Rate Ineligible columns.

PRODUCT NAME / MODEL (OR EQUIVALENT) and ALL NECESSARY COMPONENTS	Site	QTY	UNIT COST: ERATE ELIGIBLE	EXTENDED COST: ERATE ELIGIBLE	UNIT COST: ERATE INELIGIBLE	EXTENDED COST: ERATE INELIGIBLE
