Member Rafner:
- Elected as Chairperson of the North City West/School Facilities Financing Authority Board.

Member Cochrane:
- Appreciates community members in attendance.
- District is a collaborative district that worked together as a community to develop District Design 2022. The Facility Master Plan was developed in a collaborative process with District Design 2022 in mind. The Board is committed to serving every child, and every school, in this district.

Report: 5.6 REPORT: SUPERINTENDENT
Superintendent Statement Regarding Facilities Master Plan:

First and foremost, it is my intention, as Superintendent, to work with the Board to maximize the educational programs and opportunities for all District students. I recognize that due to changes in residential development, enrollment has grown in some portions of the District and declined in other portions. New residential development has occurred in the eastern portion of the District and the District is experiencing a shift in enrollment which is affecting some of the schools located East of the I-5 Freeway. The need for an additional school in the eastern portion of the District on the currently reserved Pacific Highlands Ranch property is necessary to accommodate student population growth in the eastern portion of the District.

The District presently operates two schools in the western portion of the District (i.e., West of the I-5 Freeway). The District's two existing schools, Del Mar Hills Academy and Del Mar Heights School are located within one mile of each other. Based on current and projected demographics and anticipated enrollment and operations costs, District staff has questioned whether both of these schools should continue to operate to serve the residents in the West, or, if the two schools should be reconfigured into one school serving the entire West community.

At the Board's direction, staff looked at the 2018 Facilities Master Plan and the Board's prior request that modifications be added to specify potential usage of the Del Mar Hills Academy property. In light of staff's recommendation that a systematic process and communications strategy involving the community be implemented, staff could not recommend that the Facilities Master Plan be approved with the specific usage of the Del Mar Hills Academy property being determined.

In order to comprehensively address the needs of the students in the western portion of the District, it is staff's recommendation that the District continue its analysis, including receipt of further community input, to determine the most effective manner in which the educational programs of
the District can be provided to the students in the western portion of the District. We are recommending that the District appoint a Planning Area Committee to receive information and recommendations based on community input and dialogue.

As Superintendent, I also believe it is in the District’s best interest to preserve the real estate assets of the District to allow for flexibility in use and accommodation for future educational needs. Accordingly, staff recommends that the District not sell or lease the Del Mar Hills Academy or Del Mar Heights School, but rather, determine how the two sites can best be utilized to meet the educational needs of the District. Thereafter, the Board can render a decision on how best to provide the optimal educational programs to the students in the western portion of the District.

Staff received approval of the revised Facilities Master Plan that includes the following:
1. Moving forward with the purchase of the land for a new school site in East Pacific Highlands Ranch.
2. Retaining the two school properties West of the I-5 Freeway as District assets and continue the District analysis on the optimal usage of the two school properties.
3. Establishing an inclusive District-appointed committee represented by stakeholders throughout the District that can participate in a systematic process and communications strategy involving the community to analyze these two facilities.
4. Implementing renovations at all District schools as specified in the Facilities Master Plan.

Lastly, I also believe it is in the District’s best interest to seek voter approval for necessary projects to serve the District’s educational needs. This can address the needs throughout the District. This will allow the voters to participate in the process of funding proposed school facility projects. Staff is recommending that the Board request a financing plan and project list for consideration by the Board, and ultimately the voters.
